

MODEL : LK-B30
4" DESKTOP LABEL PRINTER

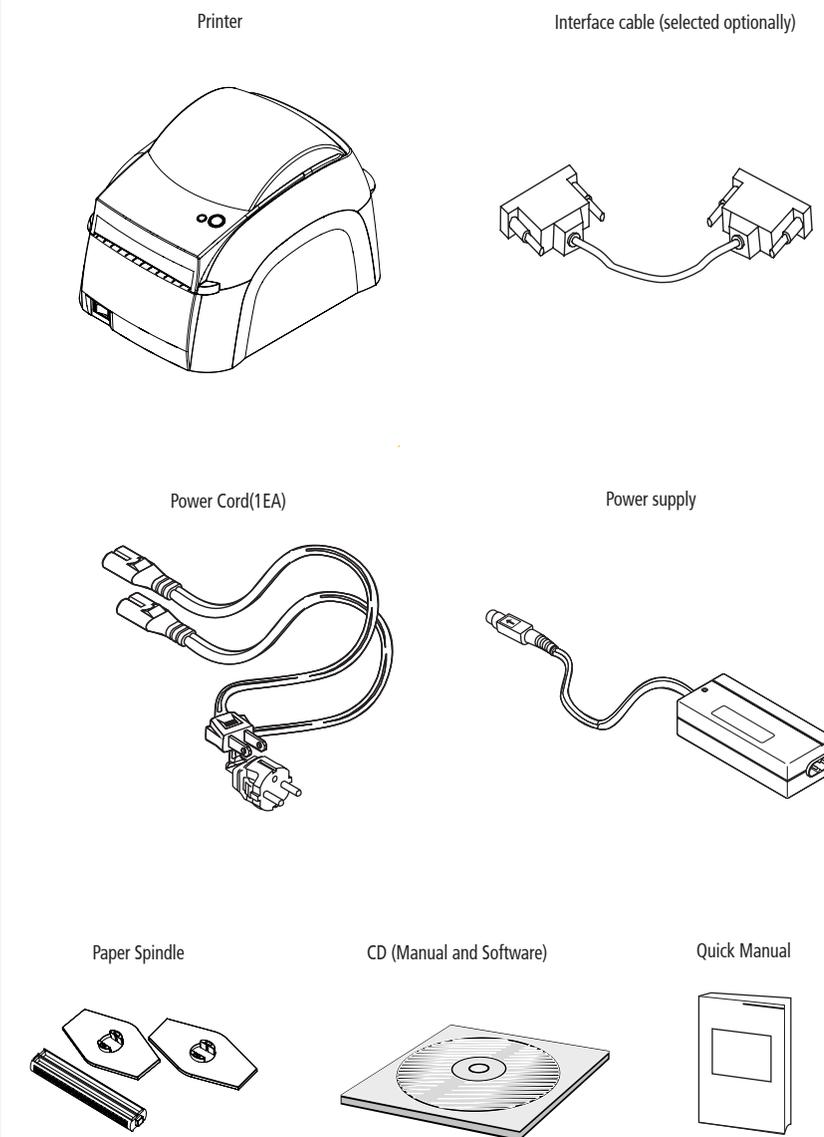

Disposal of Old Electrical&Electronic Equipment(Applicable in the European Union and other European countries with separate collection systems)

This symbol on the product or on its packaging indicates that this product shall not be treated as household waste. Instead it shall be handed over to the applicable collection point for the recycling of electrical and electronics equipment. For more detailed information about recycling of this product, please contact your local city office, your household waste disposal service or the shop where you purchased the product.

1. Unpacking

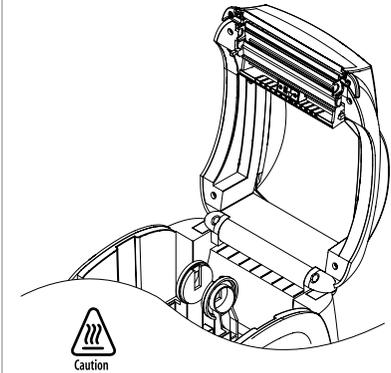

2. Printer identification

Opening the printer

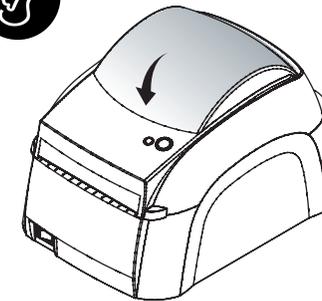

Open the upper cover by pushing the knob in the direction of the arrow.

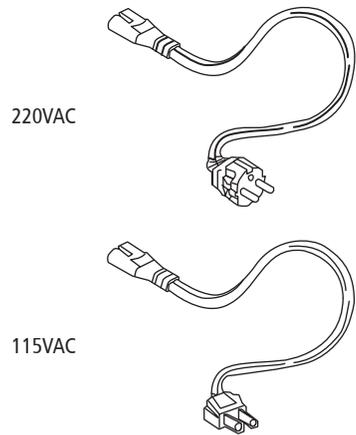

Make sure to be careful of the HOT head after using long time.

*****If the cover is not shut down completely, the printer may not work properly*****

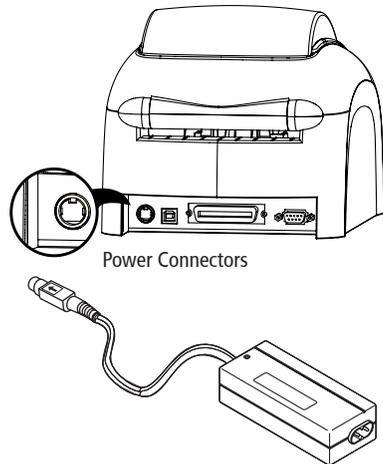

Please make sure you hear the closing sound of the upper cover.

3. Connecting power supply

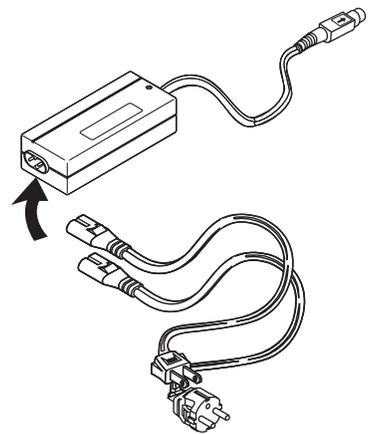

Please check the specification of the AC power cord if it is correct with your power system.

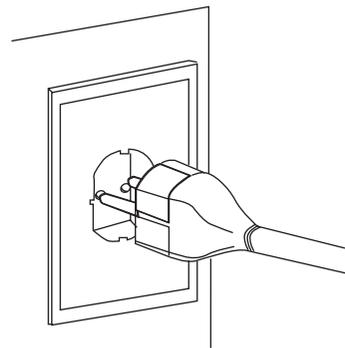

Turn off the power of the printer and connect the power supply to the printer as shown above.

1 2
3 4

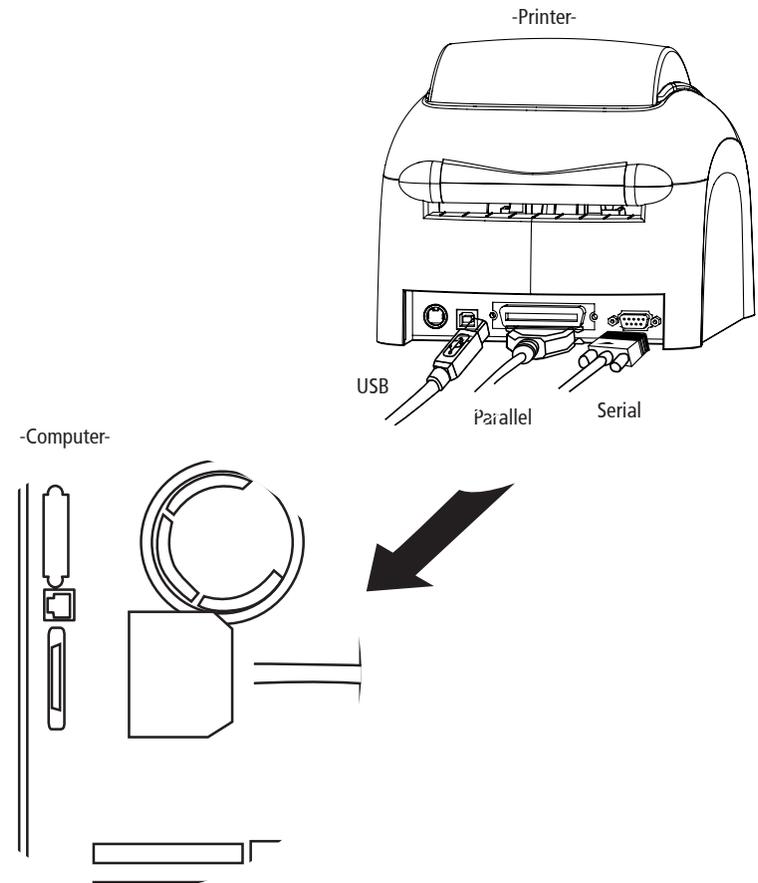

Connect the AC power cord to the power supply

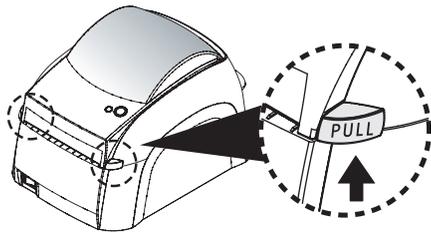

Insert a plug into the electrical outlet

4. Hooking up the printer and computer

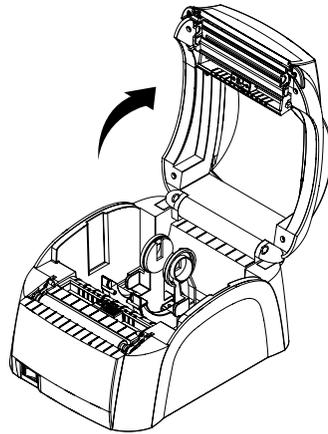

After making sure the printer is turned off, connect the printer to the PC.

5. Loading the media

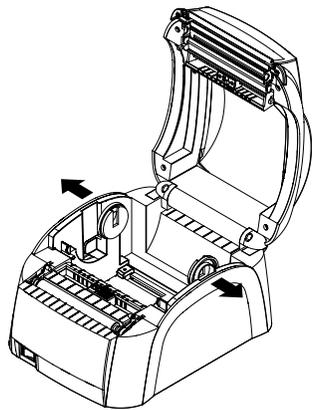

Turn off the printer and open the upper cover by pushing the knob in the direction of the arrow

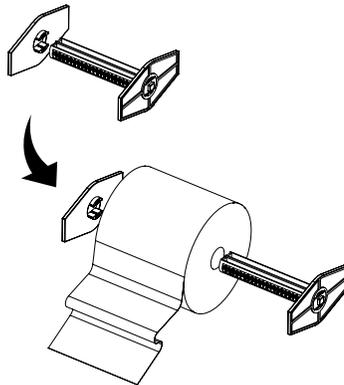

Please open the upper cover as shown above

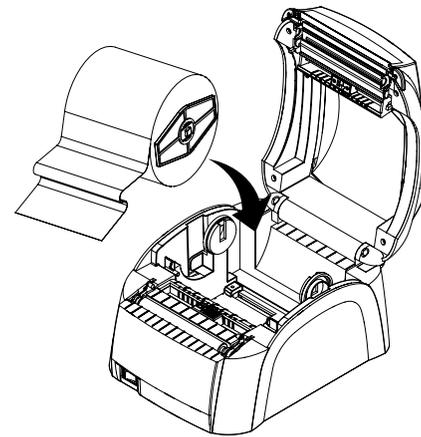

1 2
3 4

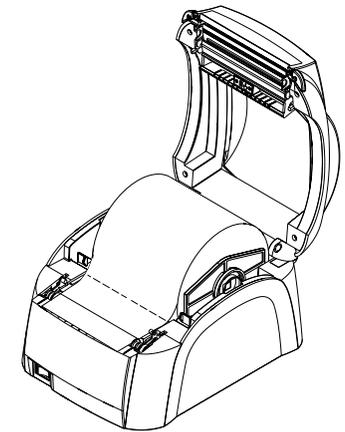

Open the paper width guides by pushing them to the right & left sides.

Insert the roll paper to the paper spindle as shown in the picture.

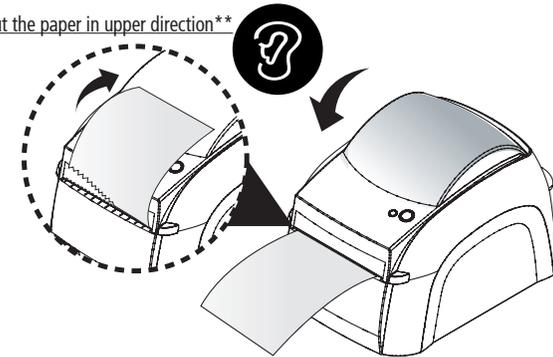

Insert the paper roll into the printer

Adjust the paper width guide to meet the paper width

5 6
7

****Please cut the paper in upper direction****

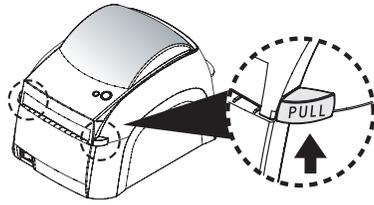

Close the upper cover completely and make sure you hear the closing sound.

NOTE

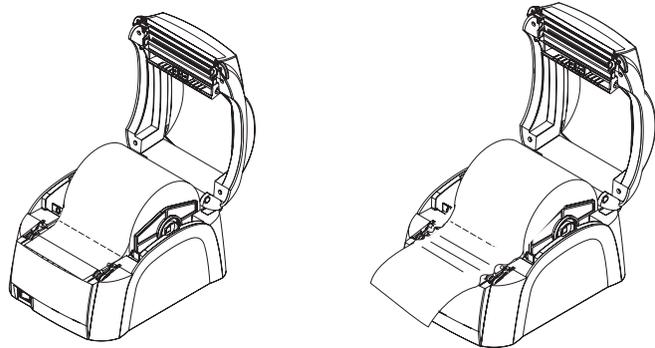

Paper fixing tap is only for 1 inch core roll paper and fan-fold paper.

For 1.5" core roll paper, mount it to the label paper guide directly without using paper fixing tap.

6. The treatment when you run short of paper and encounter cutter jam problem

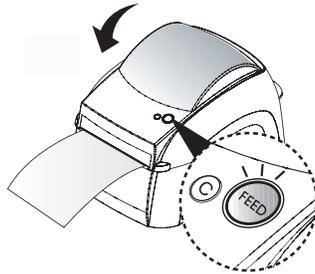

While you are printing with continuous media, please press PULL lever to the direction of the arrow.

****Installation of the new paper when the printer is short of it ****

****Remove of the paper seized by paper jam****

After the treatment has been done as picture above, the printer function normally once you press FEED button.

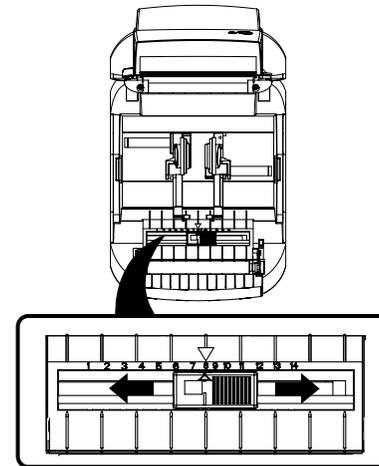

Caution

When the power is on, the ordered data will be printed without any data lost after installation of the new paper roll or treatment for paper Jam. However, if these action has been done in the case the power is off, there can be some data lost since the printer buffer will not save them while the printer power is off.

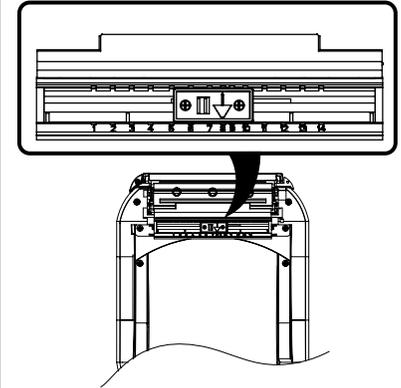

7. Setting up the sensors

Black Mark Sensor

Set Black Mark Sensor right to the size of roll paper

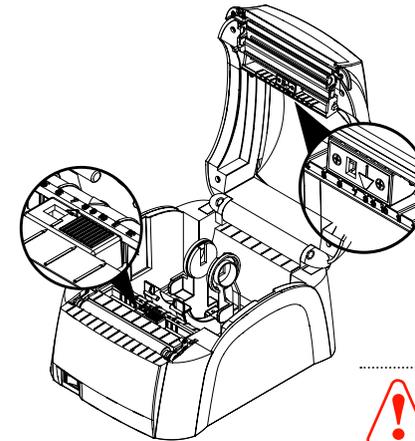

Notch Sensor

Locate notch sensor on the same number point- as the black mark sensor is indicating on.

1 2
3

****8 is the initialization number for sensor of the product.****

Black Mark Sensor and Notch sensor must always point to the same number

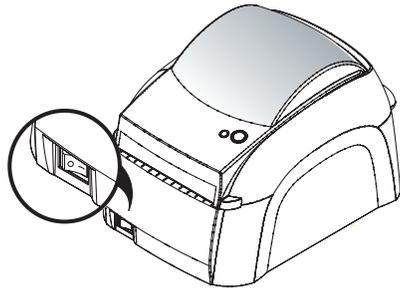

Caution

If the thickness of paper with black mark is less than 0.1mm, it is recommended setting the black mark sensor and gap sensor to different location (number) each other.

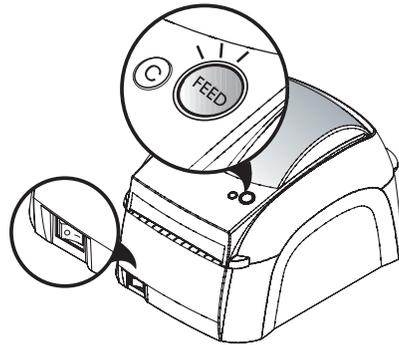

8. Self Test

✓Note

Power switch sig — ON ○ OFF

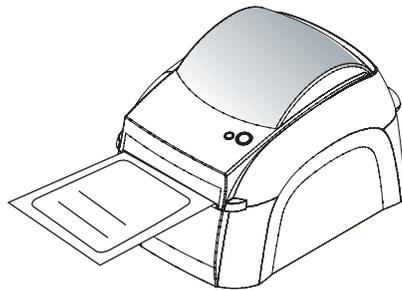

Turn off the printer

Press and hold the feed button while turning on the printer with power switch

1 2
3

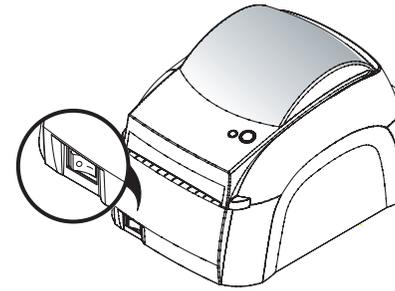

The printer prints information on the printer configuration and quality of the printing

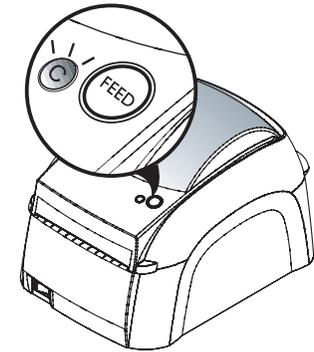

9. Auto setup for label size

✓Note

Power switch sig — ON ○ OFF

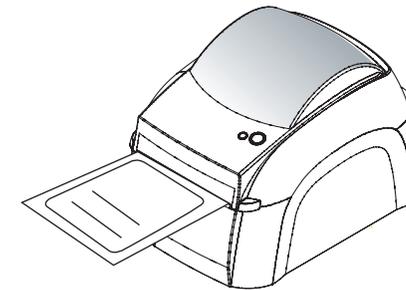

Turn off the printer

While you are pressing and holding 'C' button, turn off the power of printer.

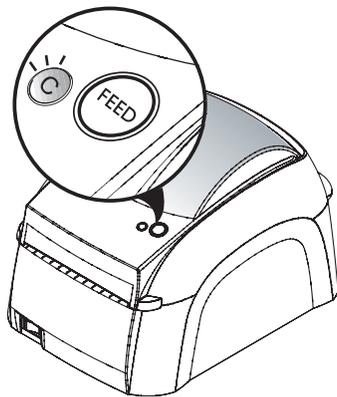

1 2
3

****Auto setup will not be applied on the continuous stock****

Printer sensor detects the size of the label, issuing the blank label.

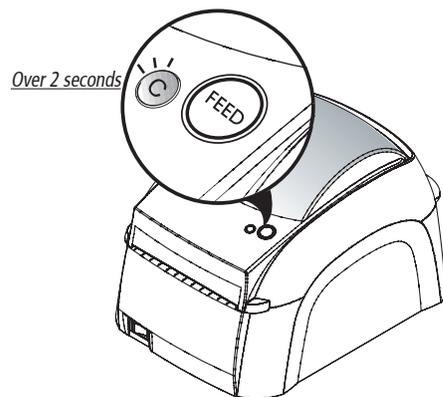

10. Pause and cancel

When you would pause on the printing process, press the 'C' key.

1
2

****When you would cancel printing, you should proceed the cancel on your PC at first. ****

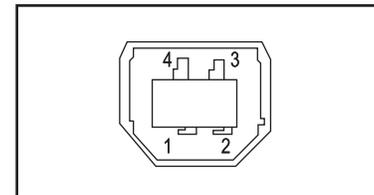

When you want cancel the printing, press and hold the "C" key for over 2 seconds.

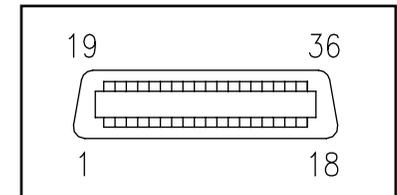

11. Connector

Interface Connectors

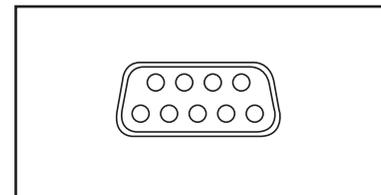

Standard

<USB " B " TYPE>

<Centronics Parallel>

<9 Pin Serial>

Centronics Parallel Interface

Pin	Signal	I/O	Description
1	STROBE-	Input	Synchronize signal Data received
2~9	DATA0~7	Input/Output	Data bit Transmitted 0~7
10	ACK-	Output	Data receiving completed.
11	BUSY	Output	Impossible to print of data receiving.
12	PE	Output	Paper empty
13	SELECT	Output	Printer status for ON/OFF line
14	AUTO FEED-	Input	Paper auto feed signal
15	GROUND	-	System ground
16	GROUND	-	System ground
17	NC	-	
18	LOGIC-H	-	+5V
19~30	GROUND	-	System ground
31	INIT-	Input	Initialize
32	ERROR-	Output	Printer error
33	GROUND	-	System ground
34	NC	-	
35	+5V	-	+5V
36	SELLECT IN-	Input	Printer select signal

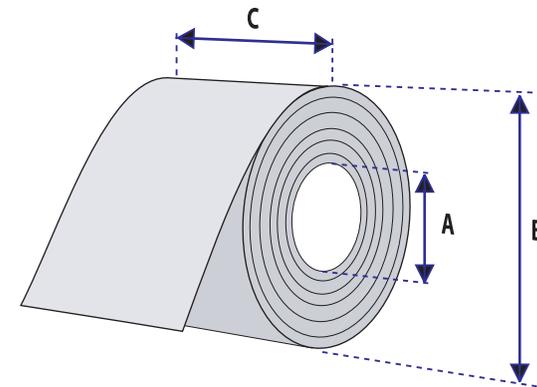

USB Interface

Pin	Signal	I/O	Description
1	+5V	-	+5V
2	DATA-	-	Printer transmit data line
3	DATA+	-	Printer transmit data line
4	GND	-	System Ground

9Pin Serial Interface

Pin	Signal	I/O	Description
2	RXD	Input	Printer receive data line RS-232C level
3	TXD	Output	Printer transmit data line RS-232C level
4, 7	DTR	Output	Printer handshake to host line RS-232C level
5	GND	-	System Ground
6	DSR	Input	Data Send Ready
1,8,9	NC	-	

12. Standard roll media

Core	
Diameter(A)	25.4 or 38.1 mm
Max. width	118 mm
Roll	
Max.diameter(B)	127 mm
Max.media width(C)	119 mm
Min.media width(C)	18 mm
Max.media thickness	0.15 mm
Min.mdeia thickness	0.06 mm

NOTE

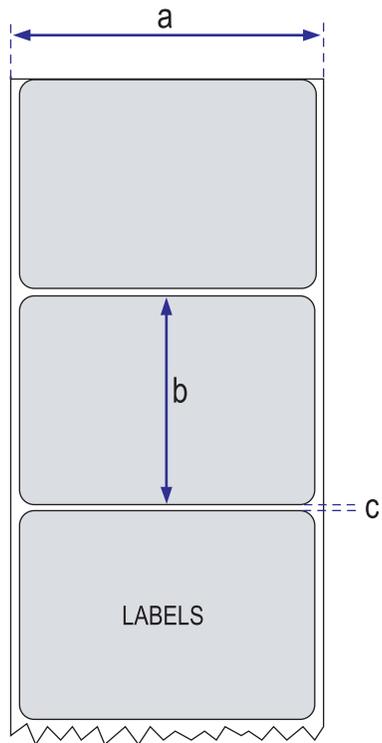

1. If the label thickness is more than 0.18mm, adjust the printing speed to 127mm/s.
2. If the label width is less than 38mm, arrange the printing speed to 127mm/s.

Protect the media against sand, grit, and other hard particles during printing and storage. Keep the cover closed. Even very small foreign particles may cause severe harm to the delicate printhead.

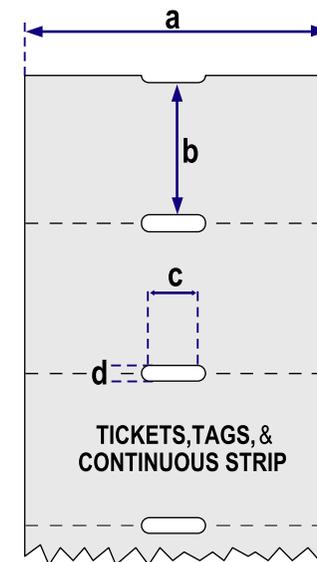

13. Standard label specification

<- a -> Media width (inch, liner)	
Maximum	118 mm
Minimum	18 mm
<- b -> Label length	
Minimum	10 mm
<- c -> Label gap height	
Maximum	10 mm
Minimum	2 mm
Liner	
Opacity	50~75%

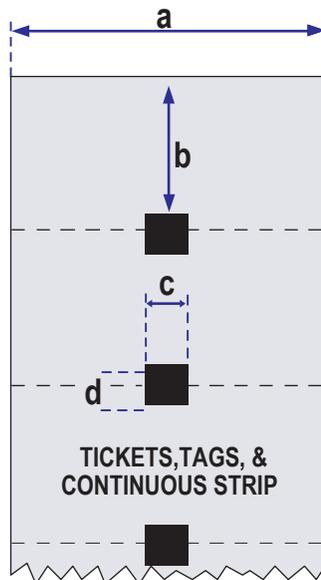

14. Label specification with Through-hole

<- a -> Tag or strip width	
Maximum	118 mm
Minimum	18 mm
<- b -> Tag length	
Minimum	10 mm
<- c -> Detection slot width	
Minimum	14 mm
<- d -> Detection slot height	
Maximum	10 mm
Minimum	2 mm

15. Label with Black Mark

<- a -> Tag or strip width	
Maximum	118 mm
Minimum	18 mm
<- b -> Tag length	
Minimum	10 mm
<- c -> Black mark width	
Minimum	14 mm
<- d -> Black mark height	
Maximum	10 mm
Minimum	3 mm

16. Continuous stock specification

The printer can use continuous paper without any detection gap or black marks.
 The printer must be set for continuous paper by the **Q** command.
 The length of each copy is decided by the size of the print image and any additional media feed is decided by the **Q** command.

Continuous paper cannot be used in the Test (Dump) Mode.

<- a ->	
Maximum	118mm
Minimum	18 mm

17. Specifications

Product Specifications

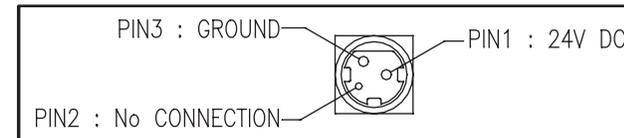

Print method	Direct Thermal	
Print speed(max)	152mm/sec	
Print width(max)	104mm	
Print length(max)	630mm	
Resolution	203dpi, 8 dots/mm	
Paper Width(min~max)	18~118mm	
Paper roll size(max)	127mm	
Paper thickness	0.06~0.18mm	
Paper Type	Label , Tag, Continuous, Fanfold	
Paper sensor	Label gap, Notch, Black Mark	
Interface	Standard	USB, RS232C, Parallel (IEEE-1284)
Memory	Standard	8MB SDRAM, (4MB+1MB) Flash
	Option	8MB Flash
Serial baud rate	9600bps~115200bps	
Peeler	Option	
Font Specification	EPL II (Eltron Programming language) ZPL II (Zebra Programming language)	
Barcode	1D	Codabar, Code93, Code128, Code39, EAN8/JAN8 EAN13/JAN13, EAN14/UPC-A, Industrial2 of 5 Standard 2 of 5, Interleaved 2 of 5, LOGMARS MSI, Plessey, POSTNET, UPC-E, UCC-EAN Extensions
	2D	MaxiCode, PDF 417
Font Specification	EPL II	5bitmapped Font
	ZPL II	7bitmapped Font, 1 Smooth Font
Weight	4.5lbs (2.0kg)	
Size (W x D x H)	190mmx254mmx169mm	

Certification

- (1) FCC PART15 CLASS A
- (2) CE EMCD (CE-EMCD Class B should use Parallel shield Cable complied with IEEE-1284 standards)
- (3) UL/cUL (UL 60950-1)

Electrical Characteristics

- (1) Input Voltage DC 24V ± 10%
- (2) Current Consumption Operating: Approx. 2.9 A (at ASC II printing)
Peak : Approx. 17 A
(at print duty 100%, For 10 seconds or less)
Stand-by : Approx. 0.15 A
- (3) Power Connector

18. Command List

No.	Command	Description
1	A	ASC II Text
2	AUTOFR	Automatic Form Printing
3	B	Bar Code
4	B	RSS-14 Bar Code
5	b	Data Matrix MaxiCode PDF417
6	C	Counter
7	C	Cut Immediate
8	D	Density
9	EI	Print Soft Font Info.
10	EK	Delete Soft Font
11	eR	User Definable Error Response
12	ES	Store Soft Font
13	f	Cut/Peel Position
14	FE	End Form Store
15	FI	Print Form Info.
16	FK	Delete Form
17	FR	Retrieve Form
18	FS	Store Form
19	GG	Retrieve Graphics
20	GI	Print Graphics Info.
21	GK	Delete Graphic
22	GM	Store Graphic
23	GW	Direct Graphic Write
24	I	Character Set Selection
25	JB	Disable Top Of Form Backup
26	JC	Disable Top Of Form Backup –All Cases
27	JF	Enable Top Of Form Backup
28	LE	Line Draw Exclusive OR
29	LO	Line Draw Black
30	LS	Line Draw Diagonal
31	LW	Line Draw White
32	M	Memory Allocation
33	N	Clear Image Buffer
34	o	Cancel Customized Settings
35	oB	Cancel Customize Bar Code
36	oE	Line Mode Font Substitution
37	oH	Macro PDF Offset
38	oM	Disable Initial Esc Sequence Feed
39	oR	Character Substitution(Euro)
40	oW	Customize Bar Code Parameters

No.	Command	Description
41	O	Options Select
42	OEPL1	Set Line Mode
43	P	Print
44	PA	Print Automatic
45	Q	Set Form Length Transmissive(Gap)Sensor Black Line Sensor Continuous Stock
46	q	Set Form Width
47	r	Set Double Buffer Mode
48	R	Set Reference Point
49	S	Speed Select
50	TD	Define Date Layout(& Print Date)
51	TS	Set Real Time Clock
52	TT	Define Time Layout(& Print Time)
53	U	Print Configuration
54	UA	Enable Clear Label Counter Mode
55	UB	Reset Label Counter Mode
56	UE	External Font Information Inquiry
57	UF	Form Information Inquiry
58	UG	Graphic Information Inquiry
59	UI	Host Prompts/Codepage Inquiry
60	UM	Codepage& Memory Inquiry
61	UN	Disable Error Reporting
62	UP	Codepage& Memory Inquiry/Print
63	UQ	Configuration Inquiry
64	US	Enable Error Reporting
65	V	Define Variable
66	W	Windows Mode
67	xa	Sense Media
68	X	Box Draw
69	Y	Serial Port Setup
70	Z	Print Direction
71	?	Download Variables
72	^ @	Reset Printer
73	^ default	Set Printer to Factory Defaults
74	^ ee	Status Report – Immediate
